

SECBOX PRO

AI-Powered SIEM that Transforms Logs into Security Insights within Seconds

Pricing That Fits Your Vision and Budget

Enterprises are challenged by endless logs, fast-moving threats, and strict regulations. SecBox unifies SIEM, EDR, threat intelligence, and automation into one AI driven platform. It transforms noise into clarity, enabling faster decisions, greater resilience, and trusted protection.

Integrated SIEM/EDR Platform

- Core SIEM based on WAZUH (EDR, FIM, Vulnerability Detection)
- Centralized Log Management
- Supports Custom Rules for Detection

Threat Intelligence

- New Threat Feed From FMISEC (IOC, TTP, Enrichment)
- Integrated with Advanced Intelligence for Correlation and Hunting.

AI & Automation

- AI-based analysis that supports classification, enrichment, and response recommendations
- SOAR integration for automated tasks
- Automated actions: block IP, isolate host, and notify SOC
- AI Chatbot provides log queries and playbook assistance

Case Management

- Ticket and workflow management for SOC operations
- Link alerts → incidents → cases → reports
- Customer-based labeling to manage alerts from multiple customers

Security Scanning

- Web Scan: detects OWASP vulnerabilities and misconfigurations.
- Cloud Scan: detects misconfigurations and compliance issues

Incident Response & Reporting

- Automatically generates incident reports from cases/alerts.
- Exports to PDF/Excel for audit and management.
